PY5103 Research Methods

SCOTCAT Credits:	20	SCQF Level 11	**Semester:**	1
Planned timetable:	3.00 pm - 4.30 pm Mon (at the University of Stirling)			

The Research Methods module is a core module for all students taking the Graduate Diploma or MLitt programme. The module aims to foster the range of skills required for independent research in philosophy. These skills run from the most concretely practical, such as knowledge of the main research resources and how to access them, to the most abstract, such as the ability to uncover the background and context of a specific issue (how it originated, what framework is presumed in a particular author's treatment of it, what other ways of thinking of the issue might be available, what literature is relevant to it, and so forth) in a way that allows one to develop an independent conception of how the issue is best addressed.

While these are general skills that will be important in your work in any branch of philosophy, they can be developed only in application to some substantive philosophical position or issues. For that reason, the module is run as a book seminar; weekly meetings will involve discussion introduced by student presentations on issues drawn from or connected with the chosen book.

Programme module type:	Compulsory for Epistemology, Mind and Language, Logic and Metaphysics, History of Philosophy, Moral, Political and Legal Philosophy and Philosophy Postgraduate Programmes.
Learning and teaching methods and delivery:	**Weekly contact**: 2 hours.
Assessment pattern:	Coursework = 100% (Research Proposal - 33%, 4,000 Word Essay - 67%)

PY5213 Texts in the History of Political Philosophy

SCOTCAT Credits:	20	SCQF Level 11	**Semester:**	2
Planned timetable:	3.00 pm - 5.00 pm Thu			

In this module a classic text from the history of philosophy will be studied in detail. The goal will be to situate the text in its historical context, to understand it in its relation to other important works by the same author, and to consider the significance of objections to the text made by the author's contemporaries and by more recent political philosophers. Examples of texts that might be studied include, but are not limited to: Plato's Republic; Aristotle's Politics; Augustine's City of God; Hobbes's Leviathan; Locke's Two Treatises of Government; Rousseau's Social Contract; The Federalist Papers; Burke's Reflections on the Revolution in France; Kant's Doctrine of Right; Hegel's Philosophy of Right; Mill's On Liberty. The module will concentrate on identifying the author's intentions in the text in question, but not to the exclusion of the determining what resources the text offers to political philosophy today.

PY5214 Wittgenstein

SCOTCAT Credits:	20	SCQF Level 11	**Semester:**	2
Planned timetable:	TBC			

This module will examine the work of one of history's great philosopher's, Ludwig Wittgenstein. Wittgenstein's two main texts, Tractatus Logico-Philosophicus and Philosophical Investigations will both be studied, focusing in both cases on Wittgenstein's conceptions of language, thought and reality. The module will involve, of course, questions of exegesis, but also questions of philosophical truth: Wittgenstein will be assumed throughout to be a valuable resource for our own philosophizing, and not merely a figure of historical interest.

Programme module type:	Optional for Philosophy, History of Philosophy, Logic and Metaphysics and Epistemology, Mind and Language.
Learning and teaching methods and delivery:	**Weekly contact**: 1 x 2-hour lecture x 11 weeks
Assessment pattern:	Coursework = 100%

PY5302 Advanced Logic B: Classical Metatheory

SCOTCAT Credits:	20	SCQF Level 11	Semester:	2
Planned timetable:	9.00 am - 11.00 am Wed			

This module begins with elementary aspects of the theory of cardinality, concentrating on equinumerosity and denumerability. The next topic is computability, focusing on two apparently quite different characterisations of this notion: computability by Turing machines and recursive functions. Fairly complete proofs of their equivalence are given. (Ultimately, we need this notion to give exact sense to the notion of a formal system.) This material serves as background to the remainder of the module which establishes the famous limitative results of Gödel (incompleteness of arithmetic), Tarski (non-definability of arithmetic truth), and Church (undecidability of first-order logic). To obtain these results we must show that the recursive functions are representable in a formal theory of the arithmetic of the natural numbers.

Programme module type:	Optional for Logic and Metaphysics, or Philosophy Postgraduate Programmes, or other postgraduate programmes within the Department as approved by the MLitt Convenor.
Learning and teaching methods and delivery:	**Weekly contact**: 2 hours.

SCOTCAT Credits:	20	SCQF Level 11	**Semester:**	2
Planned timetable:	11.00 am - 1.00 pm Mon			

This module covers the relationship between morality and the law, while also attending to whether the various understandings of that relationship are compatible with classic political principles such as the harm principle and the principle of liberal neutrality. It examines the question of whether the law generates moral reasons and whether it should be used to enforce morality, with this latter question being discussed both in the abstract and with respect to three case-studies: exploitation, coercion and blackmail. No prior exposure to philosophy of law is presumed.

If time permits we may also look at some feminist theories which are critical of both liberalism and communitarianism.
