# **School of Computer Science**

## **Important Degree Information:**

#### **B.Sc./M.A.** Honours

The general requirements are 480 credits over a period of normally 4 years (and not more than 5 years) or part-time equivalent; the final two years being an approved honours programme of 240 credits, of which 90 credits are at 4000 level and at least a further 120 credits at 3000 and/or 4000 (H) levels. Refer to the appropriate Faculty regulations for lists of subjects recognised as qualifying towards either a B.Sc. or M.A. degree.

### B.Sc./M.A. Honours with Integrated Year Abroad

The general requirements are 540 credits over a period of normally 5 years (and not more than 6 years) or part-time equivalent; the final three years being an approved honours programme of 300 credits, of which 60 credits are gained during the integrated year abroad, 90 credits are at 4000 level and at least a further 120 credits at 3000 and/or 4000 (H) levels. Refer to the appropriate Faculty regulations for lists of subjects recognised as qualifying towards either a BSc or MA degree.

**Other Information:** In the case of students who spend part of the Honours Programme abroad on a recognised Exchange Scheme, the Programme Requirements will be amended to take into account courses taken while abroad.

|---------------|--------|-----------|---|
| Prerequisite: | CS1002 |           |   |
| <b>D</b>      |        |           |   |

Description: This module provides an introduction to concepts in networked computing: client-server architectures, addressing, protocols and networking technologies. It will provide an introduction to protocols with emphasis on the Internet Protocols including TCP, IP, HTTP and SMTP and the use of Java for programming networked applications. Data and meta data formats including HTML, XML, MIME etc. will be discussed. Authoring of Web pages including the use of Java Applets will be explored.

| Class Hour:    | 10.00 am  |  |  |
|----------------|---|--|--|
| Teaching:      | Four lectures, one tutorial and one two-and-a-half hour laboratory. |  |  |
| Assessment:    | Continuous Assessment = 34%, 2 Hour Examination = 66%               |  |  |
| Re-Assessment: | Continuous Assessment = 25%, 3 Hour Examination = 75%               |  |  |
| CS1010 Discret | e Mathematics for Computer Science                                  |  |  |
| Credits:       | 10.0 Semester: 1  |  |  |

Anti-requisites:Advanced Higher or A-level Mathematics at grade B or better; MT1001, MT1002Co-requisite:CS1002

Description: This module aims to provide students without a strong post-16 mathematics qualification with the mathematical knowledge and skills necessary for the Computer Science and Internet Computing degree courses. A key ingredient will be regular practice to develop confidence, speed and accuracy in basic mathematical manipulation. The module covers the following topics: Mathematical notation and language, equations, elementary logic and rigorous arguments; Sets, sequences, and functions; Notations for these; Basic probability; Polynomials and their coefficients, degrees and roots; Graphs of functions; Matrices and matrix arithmetic.

| Class Hour:    | 12.00 noon Mone                                       | lay and Thursday.   |  |
|----------------|---|---|--|
| Teaching:      | Two lectures, for                                     | tnightly tutorial, alternate one or two hour practical classes. |  |
| Assessment:    | Continuous Asse                                       | Continuous Assessment = 50%, 1 Hour Examination = 50%           |  |
| Re-Assessment: | Continuous Assessment = 50%, 1 Hour Examination = 50% |   |  |
| CS2001 Four    | dations of Com  | outation  |  |
| Credits:       | 30.0  | Semester: 1   |  |

Prerequisite: CS1002, CS1004 and one or more of CS1010, MT1001, MT1002, Mathematics at grade C or better in either A-level or Advanced Higher, Mathematics at grade B or better in either AS-level or Higher.

Description: This module introduces the fundamental algorithms, data structures and ideas about formal languages which are at the heart of modern software, and develops skills in programming and analysis.

| Class Hour: | 9.00 am   |
|-------------|---|
| Teaching:   | Four lectures, one tutorial and a practical.          |
| Assessment: | Continuous Assessment = 34%, 3 Hour Examination = 66% |

## **Information Technology (IS) Modules**

## IS1001 Information Technology

| Credits: | 20.0 | Semester: | 1 & 2 (offered twice) |
|----------|------|-----------|-----------------------|
|          |      |           |                       |

Description: This module introduces students to the use of computers, providing skills in word processing, spreadsheets, graphics, and using and contributing to the Internet and World Wide Web. Lectures also cover systems and communications and computers and society. No previous computing experience is necessary.

| Class Hour:    | 11.00 am (semester 1) 12.00 noon (semester 2)                       |
|----------------|---|
| Teaching:      | Four lectures, one tutorial and one two-and-a-half hour laboratory. |
| Assessment:    | Practical Work = 33%, Class Tests = 33%, 1 Hour Examination = 34%   |
| Re-Assessment: | Practical Work = 33%, Class Tests = 33%, 1 Hour Examination = 34%   |

# The details of the Honours modules – that is 3000 and 4000(H) level modules – which relate to the programmes listed in this section, are available in the Honours Course Catalogue.

# **Computer Science**
