

School of Psychology

Important Degree Information:

B.Sc./M.A. Honours

The general requirements are 480 credits over a period of normally 4 years (and not more than 5 years) or part-time equivalent; the final two years being an approved Honours programme of 240 credits, of which 90 credits are at 4000 level and at least a further 120 credits at 3000 and/or 4000 levels. Refer to the appropriate Faculty regulations for lists of subjects recognised as qualifying towards either a B.Sc. or M.A. degree.

B.Sc./M.A. Honours with Integrated Year Abroad

The general requirements are 540 credits over a period of normally 5 years (and not more than 6 years) or part-time equivalent; the final three years being an approved Honours programme of 300 credits, of which 60 credits are gained during the integrated year abroad, 90 credits are at 4000 level and at least a further 120 credits at 3000 and/or 4000 levels. Refer to the appropriate Faculty regulations for lists of subjects recognised as qualifying towards either a B.Sc. or M.A. degree.

Other Information: BPS Recognition

Passes in PS3021, PS3022, PS3031, PS3032, PS3033, PS3034, PS3035 or PS3036, PS3037 or PS3038, PS4040 and PS4050 are required for recognition by the British Psychological Society. This is not possible for degrees in combination with Theological Studies, Economics, History, International Relations, Management, Modern languages (MA degrees) or Social Anthropology. This recognition is required for those who wish to gain employment as professional psychologists.

In the case of students who spend part of the Honours programme abroad on a recognised Exchange Scheme, the Programme Requirements will be amended to take into account courses taken while abroad.

Students still completing degree programmes as defined in previous Course Catalogues should discuss their module selections with their Honours Adviser(s).

Psychology (PS) Modules

PS3021 Research Design and Analysis I

Credits: 15 Semester: 1

Description: This module is designed to provide a basic understanding of research design and statistics that will provide the foundations for independent empirical research and critical analysis required in the final year of the Honours programme. Emphasis will be placed on the acquisition of design and analysis skills and an understanding of the underlying philosophy that guides research. The syllabus will include core aspects such as ethical issues in research, basic statistics, technical writing and the use of statistical packages.

Class Hour: 9.00 am - 11.00 am / 2:00-5:00pm Monday

Teaching: One lecture and one 3 hour laboratory class or seminar.

Assessment: Continuous Assessment = 40%, 2 Hour Examination = 60%

Psychology – Honours 2009/10 – February 2010

PS3022 Research Design and Analysis 2

Credits: 15 Semester: 2

Prerequisite: PS3021

Description: This module is designed to provide a more advanced understanding of research design and statistics. Emphasis will be placed on the acquisition of analytical skills covering typical research situations encountered in the behavioural sciences. The syllabus will include advanced analysis of variance, multivariate statistics and non-parametric statistics, as well as training in computerised data analysis and presentation.

Class Hour: 9.00 am - 11.00 am / 2:00-5:00 pm Monday

Teaching: One lecture and one 3 hour laboratory class or seminar.

Assessment: Continuous Assessment = 40%, 2 Hour Examination = 60%

PS3031 Conceptual Issues and Theoretical Perspectives

Credits: 10 Semester: 1 (first half)

Anti-requisite: PS3012

Description: This module addresses the historical and philosophical background to current debates in psychology. The module will be taught via lectures and seminars including student presentations. Emphasis will be placed on the development of critical analysis of alternative models and levels of explanations of behaviour, and the ability to relate conceptual debates in psychology to issues in the real world.

Class Hour: 9.00 - 11.00 am and 2.00 - 5.00 pm.

Teaching: One 2 hour lecture and one 3 hour laboratory class or seminar

Assessment: Continuous Assessment = 100%

PS3032 Assessment in Clinical Psychology

Credits: 10 Semester: 2 (second half)

Anti-requisite: PS3012

Description: This module presents psychopathological conditions and provides a basic understanding of the underlying neuronal and/or cognitive-behavioural mechanisms. Examples will be drawn from the field of clinical psychology and/or clinical neuropsychology. The module will further explore in detail the tools and procedures used to assess psychopathological conditions by discussing their theoretical/statistical background and by demonstrating how to use these tools in clinical and experimental settings.

Class Hour: 9.00 - 11.00 am and 2.00 - 5.00 pm.

Teaching: One 2 hour lecture and one 3 hour laboratory class or seminar

Assessment: One-and-a-half hour Examination = 100%

PS3033 Developmental Psychology

Credits: 10 Semester: 2 (first half)

Anti-requisite: PS3010/PS3011

Description: This module is designed to equip students with an appreciation of key principles, concepts, methods and discoveries in developmental psychology, with an emphasis on evolutionary and comparative perspectives that are a particular strength of such work in St Andrews. The module aims to offer a broad perspective spanning infancy to childhood, and a range of key topics in cognitive and social development.

Class Hour: 9.00 - 11.00 am and 2.00 - 5.00 pm.

Teaching: One 2 hour lecture and one 3 hour laboratory class or seminar

Assessment: Continuous Assessment = 100%

PS3034 Social Psychology

Credits: 10 Semester: 2 (first half)

Anti-requisite: PS3010/PS3011

Description: This module explores in depth key topics across the breadth of social psychological enquiry. A variety of research approaches will be examined in order to develop the scientific understanding and critical skills in this field. Approaches that will be covered include social cognition, social identity and the study of intergroup relations. In each case, the strengths and limitations of the approaches are explored, and theoretical knowledge will be linked to current events.

Class Hour: 9.00 - 11.00 am and 2.00 - 5.00 pm.

Teaching: One 2 hour lecture and one 3 hour laboratory class or seminar

Assessment: Continuous Assessment = 100%

PS3035 Cognitive & Behavioural Neuroscience

Credits: 10 Semester: 1 (first half)

Anti-requisite: PS3008 and PS3009

Description: This module aims to provide an understanding of psychological knowledge in several inter-related domains concerned with the biological bases of behaviour. Emphasis will be laid on basic experimental science from analysis of molecular and synaptic events, single cell studies, brain activity scans, and clinical studies, and the relationship between cognitive, emotional, behavioural, neurological and physiological processes will be examined.

Class Hour: 9.00 - 11.00 am and 2.00 - 5.00 pm.

Teaching: One 2 hour lecture and one 3 hour laboratory class or seminar

Assessment: One-and-a-half hour Examination = 100%

PS3036 Evolutionary and Comparative Psychology

Credits: 10 Semester: 2 (second half)

Anti-requisite: PS3010/PS3011

Description: This module will address evolutionary and comparative approaches to psychology. The aim is to provide an understanding of major evolutionary forces and how they have shaped animal and human behaviour and psychology. Key principles, concepts and methodologies will be introduced and related to specific topic areas such as the evolution of social behaviour and the evolutionary origins of language and cognition.

Class Hour: 9.00 - 11.00 am and 2.00 - 5.00 pm.

Teaching: One 2 hour lecture and one 3 hour laboratory class or seminar

Assessment: Continuous Assessment = 100%

PS3037 Perception

Credits: 10 Semester: 1 (second half)

Anti-requisite: PS3007

Description: The aim of this module is to develop an understanding of visual perception and its functions. Stress will be laid on the integration of findings from physiology, neuropsychology, anatomy, and psychophysics. Topic areas covered will include theories of human vision and their application to understanding our ability to perceive distinct visual properties, for example the shape, size, location and identity of objects. Emphasis will be placed on the development of the skill of critical evaluation of evidence and theory.

Class Hour: 9.00 - 11.00 am and 2.00 - 5.00 pm.

Teaching: One 2 hour lecture and one 3 hour laboratory class or seminar

Assessment: One-and-a-half Hour Examination = 100%

Psychology – Honours 2009/10 – February 2010

PS3038 Cognition

Credits: 10 Semester: 1 (second half)

Anti-requisite: PS3007

Description: The aim of this module is to develop an understanding of human memory and attention. Topic areas covered will include theories of attention, short and long term memory, processes involved in memory encoding, maintenance and retrieval. Emphasis will be placed on the development of the skill of critical evaluation of evidence and theory. Lectures will be accompanied by practical classes, in which students will gain experience of the experimental methods used in cognitive research, and seminars in which research papers will be critically evaluated.

Class Hour: 9.00 - 11.00 am and 2.00 - 5.00 pm.

Teaching: One 2 hour lecture and one 3 hour laboratory class or seminar

Assessment: One-and-a-half Hour Examination = 100%

PS4040 Psychology Review

Credits: 10 Semester: Whole Year

Co-requisite: PS3021 and PS3022.

Description: This module will foster the abilities needed to search, collate and integrate an extensive area of psychological literature. Emphasis will be placed on analytical and methodological issues, and this module therefore complements PS3021 and PS3022. A systematic approach to the analysis of a specific body of literature will be encouraged. Students are invited to identify preferred subject matters so long as they fall within the area of the supervisor's expertise. Supervision will be given to aid students in the collation, planning and organisational phases of their work. The review will be limited to 5,000 words.

Teaching: Individual supervision by pre-assigned member of staff

Assessment: Review = 100%

PS4050 Psychology Project

Credits: 30 Semester: Whole Year

Prerequisites: PS4040, PS3021 and PS3022. This module is normally completed in the first year of the Honours Programme.

Description: The aim of the project is to develop and foster the skills of experimental design, appropriate research management and statistical analysis. A wide choice of topics is possible, but the skills developed in modules PS3021, PS3022 and PS4040 are an essential preparation. The empirical part of the project may be conducted with another student, to allow greater research scope and the choice of more realistic problems, but all analysis and report-writing must be carried out individually. Topics range over all areas of psychology under active investigation in the School, and effort is made to arrange for students to work in one of their preferred areas.

Teaching: Individual supervision by pre-assigned member of staff

Assessment: 6,000 word Project = 100%

PS4060 Review Essay

Credits: 15 Semester: Whole Year

Prerequisite: Available only to students in the second year of the Honours Programme.

Description: In this module candidates will choose a title from a range of topics and questions and write an unsupervised review essay addressing it. Titles will be designed to allow candidates both to tackle an issue of current active interest in psychology and to display their ability to appreciate links between material from different areas of psychological inquiry.

Teaching: This is an unsupervised assignment

Assessment: 5,000 Word Dissertation = 100%

PS4064 Working Memory

Credits: 15 Semester: 1

Prerequisites: Available only to students in the second year of the Honours Programme.

Description: This module will have both a theoretical and an applied aspect. It will illustrate how cognitive models are developed, what type of evidence is important in sustaining this development and the weight of evidence required to significantly alter the direction of such development. In its theoretical aspect, the module will investigate an influential model of memory - the Working Memory Model. The model is wide-ranging with aspects concerned with verbal and visual memory and with attention. Increasingly, there is neuropsychological input to the model's development. In its applied aspects, the module will acknowledge the fact that WM is often used as a theoretical backdrop to our understanding of a variety of different "real life" matters. Teaching will be based on seminars in which class members will be expected to play an active part, contributing on the basis of their own extensive reading. Emphasis will be placed on development of the skill of critical evaluation of research reports, and those skills necessary for going beyond current topics into future directions of research.

Class Hour: 11.00 am - 1.00 pm.

Teaching: Two hour seminars

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%

PS4065 Visual Perception

Credits: 15 Semester: 1

Prerequisites: Available only to students in the second year of the Honours Programme.

Description: This module will include lectures and seminars in which class members will be expected to play an active part, contributing on the basis of their own extensive reading and reviewing of research papers. The aim of the module is to develop an advanced understanding of visual recognition and its functions. Emphasis will be placed on development of the skill of critical evaluation of evidence and theory. Topics will be selected from those of particular current interest in visual processing (e.g. information conveyed by the face). The module emphasises the biological underpinnings of perception and will draw on evidence from a variety of experimental methods (e.g. neuroscience and psychophysics).

Class Hour: 11.00 am - 1.00 pm

Teaching: Two hour seminars

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%

PS4066 Neural Modelling

Credits: 15 Semester: 1

Prerequisites: Normally available only to students in the second year of the Honours Programme.

Description: This module aims to develop an understanding of some of the fundamental principles of brain function in terms of the information processing involved in psychological phenomena and working models of specific neural circuits in the brain. Teaching will be based on seminars in which class members will be expected to play an active part, contributing on the basis of their extensive reading. Emphasis will be placed on developing the skill of critical evaluation of research reports, and those skills necessary for going beyond current topics into future directions of research. There will be some flexibility on the choice of topics to be covered by the seminars, but they may include some of the following topics: models of processes involved in perception, memory, neural organisation (e.g. neural maps), the representation of information and knowledge (e.g. neural coding and decoding) and models of cognitive processes.

Class Hour: 11.00 am - 1.00 pm

Teaching: Two hour seminars

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%

Psychology – Honours 2009/10 – February 2010

PS4071 Behavioural Neuroscience

Credits: 15 Semester: 2

Prerequisites: Available only to students in the second year of the Honours Programme.

Description: The overall aim of this module is to allow students access to current research in the area of behavioural neuroscience. Possible topics include motivation, learning and attention. Past themes explored in the module include: the relationship between ‘normal’ learning and addiction; the transition from goal-directed action to stimulus-response habit; the neural basis of compulsive gambling; the efficacy of biological treatments of addiction; and the behavioural and neural effects of MDMA (‘ecstasy’). Results from both human and animal research will be considered in parallel, with examples of papers ranging from molecular neuroscience to neuropsychology. The format of the module will include lectures (which are designed to provide the students with the background necessary to read research articles); guided seminars and student presentations summarising research articles. In order to maximise the benefits of the students’ presentations, each student will meet with the lecturer at least twice to discuss the topic and content of their talk.

Class Hour: 11.00 am - 1.00 pm

Teaching: Two hour seminars

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%

PS4074 Cognitive Psychology and the Emotional Disorders

Credits: 15 Semester: 2

Prerequisites: Available only to students in the second year of the Honours Programme.

Description: This module is designed to demonstrate how theories from cognitive psychology can enhance our understanding of the emotional disorders. Teaching will be based on individual seminar presentations followed by class discussion. In the presentations students will be expected to review and critically evaluate original research. Seminars will focus on topics such as autobiographical memory and depression, autobiographical memory and anxiety, attentional bias in depression and anxiety, and interpretative biases in depression and anxiety. At the end of the seminar series, students should understand how depression and anxiety can be differentiated on the basis of these biases.

Class Hour: 11.00 am - 1.00 pm

Teaching: Two hour seminars

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%

PS4080 Social Memory

Credits: 15 Semester: 2

Prerequisite: Only available to students in the second year of the Honours Programme.

Description: This module aims to develop an advanced understanding of the role of memory in everyday life. In particular it will consider the latest theoretical and methodological advances in the study of memory for self and for others drawing upon studies from the social, cognitive, and social neuroscience literatures. Core theoretical issues such as memory updating, memory malleability, and the role of memory in identity will be considered alongside a range of practical everyday problems and possible solutions. Teaching will be seminar based and students will be expected to read independently and contribute actively to sessions. Emphasis will be placed on the development of critical skills and the ability to relate individual studies and theories to broader conceptual debates in psychology and issues in the real world.

Class Hour: 11.00 am - 1.00 pm.

Teaching: Two hour seminar.

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%

PS4081 Formation and Reduction of Prejudice and Stereotyping

Credits: 15 Semester: _____

Availability: Not available in 2009-10

Prerequisite: Only available to students in the second year of the Honours Programme.

Description: This advanced-level module aims to develop students' knowledge about how prejudice and stereotyping are formed and also the practical steps that can be taken to reduce them. Sessions will include material on the effects of social categorisation processes, stereotype formation and change, automaticity of stereotyping intergroup bias from the "victim's" perspective, intergroup contact, and acculturation. Teaching will be seminar-based. Students will be expected to read and prepare for sessions independently and show active involvement during sessions, for example, in the form of semi-formal presentations of read material. The module focuses on the development of analytic and critical skills and the capacity to link different theoretical models to current debates in social psychology.

Class Hour: To be arranged.

Teaching: Two hour seminars

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%

PS4083 Psychology of Music

Credits: 15 Semester: 1

Prerequisite: Only available to students in the second year of the Honours Programme.

Description: The aim of the module is to introduce students to psychological processes underlying music perception, cognition, and performance. The relationship between musical phenomena and mental functions will be illustrated. The module will cover different aspects of music perception including psychoacoustics and sound perception, music cognition including music memory emotion and expectancies, skilled performance as well as abnormalities in music perception and performance. The module will be taught in the form of seminars including student presentations. Emphasis will be placed on the development of critical thinking and the ability to relate conceptual debates in psychology to issues in the real world.

Class Hour: 11.00 am - 1.00 pm

Teaching: Two hour seminars

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%

PS4084 Psychology of Visual Art

Credits: 15 Semester: 2

Prerequisite: Only available to students in the second year of the Honours Programme.

Description: This module will explore the value and limitations of a scientific approach to understanding visual art, and the extent to which a neurological theory of aesthetic experience is possible. These questions will be addressed from evolutionary, cognitive and neurological perspectives. Examples of specific topics that will be tackled include: can the appreciation of art be reduced to a set of physiological responses?; is it possible to describe laws of aesthetic experience?; can particular works of art be understood in terms of the known properties of the visual system?; what happens to visual artists with neuropsychological deficits? The module will be based on a critical analysis of contemporary scientific studies in the field.

Class Hour: 11.00 am - 1.00 pm

Teaching: Two hour seminars

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%

Psychology – Honours 2009/10 – February 2010

PS4085 Evolution and Development of Social and Technical Intelligence

Credits: 15 Semester: 2

Prerequisite: Only available to students in the second year of the Honours Programme.

Description: The last two decades have witnessed a surge of research on social and technical intelligence, both in humans and an increasingly wide range of non-human animal species. This module surveys the principal discoveries, integrating field and captive studies, as well as both observational and experimental methodologies, to trace the evolution and development of aspects of social intelligence such as imitation and theory of mind, and technical intelligence, such as tool use and understanding of causality. Key aims include appreciating the range of methodologies that have been developed and how these can be used to trace the evolution and ontogeny of the underlying psychological mechanisms.

Class Hour: 9.00 am - 11.00 am

Teaching: Two hour seminars

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%

PS4086 Origins and evolution of mind reading (Theory of Mind)

Credits: 15 Semester: 1

Prerequisite: Only available to students in the second year of the Honours Programme.

Description: The module will offer a comparative approach to the emergence of the ability to understand mental states in children and non-human primates, and its alteration in autism. This ability (also known as Theory of Mind) is at the heart of many of humans unique cognitive achievements, but their origins can be traced back in evolution and development. The course will discuss the current state of research in this area, emphasizing both empirical and conceptual aspects posed by the combination of the evolutionary and developmental approaches.

Class Hour: 11.00 am - 1.00 pm

Teaching: Two hour seminars

Assessment: Continuous Assessment = 25%, 2 Hour Examination = 75%
